

# How Homes2Cheap.com can sell you home for \$1,000 Down and only \$350 per month\*.

## OUR MISSION

In every city in America, all across the United States banks are having to foreclose on hard working people who, for no good reason of their own, become disabled, or unemployed, or even homeless.

These banks have literally thousands of homes in foreclosure. They don't want the homes, they are in the banking business . . . not the real estate business. It costs them thousands of dollars to maintain all these empty homes.

It is in the bank's best interests to liquidate this long list of empty "expenses" to prevent further losses against the loans that went bad. Many banks are large conglomerates and simply wholesale them out through Wall Street and Hedge funds.

We simply buy low and re-sell low to deserving families who are down on their luck and just trying to survive in today's expensive cost of living.

Homes2Cheap buys homes in volume from the hedge funds on Wall Street and large banking institutes. We get them at a very low price & we in turn re-sell them to the public with low down payments and low monthly payments they can afford to make. Rebuilding their lives and credit, allowing them to start over again in an affordable environment in today's high priced, fast paced world of greed.

No survey fees, no title searches, no points to pay at closing, no high interest rates, no large down payments.

**We Are Putting America Back into Homes.  
at \$1000 Down and \$350 a month\*.**
